***Allowable Subject Matter***

1. Claims 8-15 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art does not teach or suggest the contact system for a power circuit breaker, the contact system comprising two rockers mounted on the rotary contact bridge so as to tilt about a tilting axis with respect to the rotary contact bridge parallel to the rotation –symmetrical axis; two contact force springs, each having a longitudinal axis and being supported between the breaker shaft segment and one of the rockers; wherein the rotary contact bridge, the breaker shaft segment, the contact force springs, and the rockers form a tilting snap-action mechanism for holding the rotary contact bridge in a repulsed position after the fixed contacts have been electrodynamically repulsed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
